

1.Register

2.Login

3.Add Book

The screenshot shows the Postman interface with a workspace named "Sooriyaveena A's Workspace". On the left, under "COLLECTIONS", there is a "My Collection" containing "PUT Get data" and "POST Post data". The main panel displays a POST request to "http://localhost:9000/books/addbooks". The request body is a JSON object:

```
{  "isbn": "101",  "title": "Java",  "author": "John",  "publicationYear": 2020}
```

. The response is a 200 OK status with a response time of 539 ms and a body size of 538 B. The response body is a JSON object:

```
{  "success": true,  "message": "Book added",  "data": {    "title": "Java",    "author": "John",    "isbn": "101",    "publicationYear": 2020  }}
```

. The bottom right corner features a "New Chat" button and a text input field with the placeholder "Describe what you need. Press @ for context, / for Skills."

4.Get All Books

The screenshot shows the Postman interface with the same workspace. The main panel displays a GET request to "http://localhost:9000/books/getallbooks". The response is a 200 OK status with a response time of 19 ms and a body size of 537 B. The response body is a JSON object:

```
{  "success": true,  "message": "Success",  "data": [    {      "title": "Java",      "author": "John",      "isbn": "101",      "publicationYear": 2020    }  ]}
```

. The bottom right corner features a "New Chat" button and a text input field with the placeholder "Describe what you need. Press @ for context, / for Skills."

5. Get Book By ISBN

The screenshot shows the Postman interface with a GET request configured. The URL is `http://localhost:9000/books/getbookbyisbn/101`. The response status is **200 OK** with a response time of 25 ms and a body size of 540 B. The response body is displayed in JSON format:

```
{  "success": true,  "message": "Book fetched",  "data": {    "title": "Java",    "author": "John",    "isbn": "101",    "publicationYear": 2020  }}
```

The left sidebar shows the 'My Collection' with 'Get data' selected. The bottom status bar includes 'Connect Git', 'Console', and 'Terminal'.

6. Update Book By ISBN

The screenshot shows the Postman interface with a PUT request configured. The URL is `http://localhost:9000/books/updatebook/101`. The request body is a JSON object:

```
{  "title": "Java Spring",  "author": "Jane and John",  "publicationYear": 2023}
```

The response status is **200 OK** with a response time of 54 ms and a body size of 556 B. The response body is displayed in JSON format:

```
{  "success": true,  "message": "Book updated",  "data": {    "title": "Java Spring",    "author": "Jane and John",    "isbn": "101",    "publicationYear": 2023  }}
```

The left sidebar shows the 'My Collection' with 'Get data' selected. The bottom status bar includes 'Connect Git', 'Console', and 'Terminal'.

7.Delete Book

The screenshot shows a REST client interface with a workspace named "Sooriyaveena A's Workspace". The main panel displays a **DELETE** request to `http://localhost:9000/books/deletebook/101`. The response status is **200 OK** with a response time of 44 ms and a body size of 476 B. The response body is in JSON format:

```
{  "success": true,  "message": "Book deleted",  "data": null}
```

The interface includes a sidebar with "COLLECTIONS" (My Collection) and "ENVIRONMENTS". The bottom status bar shows "Connect Git", "Console", and "Terminal".

8.Mysql

The screenshot shows the MySQL Workbench interface. The SQL editor contains the query `DELETE FROM user;`. The "Result Grid" shows the execution results:

id	email	password	role
1	jane@gmail.com	jane	USER

The "Output" pane shows the execution log with the following messages:

- 10 12:52:24 select 'from user LIMIT 0, 1000' 2 rows(s) returned
- 11 12:52:18 drop table books; 0 rows(s) affected
- 12 12:52:21 drop table user; 0 rows(s) affected
- 13 12:12:29 select 'from user LIMIT 0, 1000' 1 row(s) returned
- 14 12:52:47 select 'from user LIMIT 0, 1000' 0 rows(s) returned
- 15 12:48:43 select 'from user LIMIT 0, 1000' 1 row(s) returned

The screenshot shows the MySQL Workbench interface. The SQL editor contains the query `INSERT INTO book (title, author, publication_year) VALUES ('101', 'Jane and John', 2020);`. The "Result Grid" shows the execution results:

id	author	publication_year	title
101	Jane and John	2020	Jane

The "Output" pane shows the execution log with the following messages:

- 16 12:47:39 select 'from Book LIMIT 0, 1000' 0 rows(s) returned
- 17 12:48:50 INSERT INTO book (title, author, publication_year) VALUES ('101', 'Jane and John', 2020, NULL) Error Code: 1054 Unknown column 'user_id' in 'field list'
- 18 12:49:10 INSERT INTO book (title, author, publication_year) VALUES ('101', 'Jane and John', 2020) 1 row(s) affected
- 19 12:49:16 INSERT INTO book (title, author, publication_year) VALUES ('101', 'Jane and John', 2020) Error Code: 1062 Duplicate entry '101' for key book.PRIMARY
- 20 12:49:26 drop table user; 0 rows(s) affected
- 21 12:49:30 select 'from Book LIMIT 0, 1000' 1 row(s) returned
